

DESCRIPTION

After the equipment to be worked on has been isolated from the energy source, the lockout keys are placed inside the multiple lockout box and then padlocked by the controlling person.

Each person working then applies their own unique padlock to the lockout box. After all the unique padlocks have been removed (including the controller's padlocks) can the necessary keys be re-issued to re-start.

KEY FEATURES AND BENEFITS

- Portable Red Group Lockbox - "Ammo box" design
- Secure each lockout point on a piece of equipment with just one designated safety padlock
- Accommodates up to 12 padlocks OR hasps - allows for use by more workers
- Key slot - Keys can be deposited even when the Lockbox is locked out!
- Reinforced latch to ensure that LOTO equipment can be stored inside whilst on the move
- Each authorized employee locks one personal safety padlock onto the box, removing them only when their work is complete
- Weighs 112g

APPLICATION

- Commercial
- Industrial
- Internal or external applications
- Lockout/Tagout systems
