

**INSTALLATION / OPERATION**

Slide the outer cover down and this releases the locating lug of the shackle. Feed the shackle through the lockout device and slide body back up to align the padlock holes. Finally insert up to 6, 9mm diameter shackle safety padlocks through the aligned holes.

The red heavy duty flexible nylon hasp is highly visible and accepts padlocks with a shackle diameter of upto 9mm (0.35").

**KEY FEATURES AND BENEFITS**

- Manufactured from heavy duty flexible nylon
- Highly visible in red
- Non-conductive applications
- Flexible and easy to manipulate into place
- Accepts padlocks with a shackle diameter upto 9mm (0.35")
- Accepts upto 6 padlocks
- Weighs 32g

**APPLICATION**

- Commercial
- Industrial
- Internal or external applications
- Lockout/Tagout systems

**DIMENSIONS**

Width: 50mm (1.96")  
 Height: 175mm (6.88")

Shackle Clearance: 25mm diameter (1") to 22mm (0.86")x 80mm (3.14")  
 Padlock Holes: 9mm (0.35")

**CHEMICAL RESISTANCE**

Acids Concentrated	Poor
Alcohols	Good
Alkalis	Good Fair
Greases and Oils	Good
Ketones	Good
