

DESCRIPTION

This durable, lightweight, highly visible safety padlock has a non-conductive nylon body and a steel shackle. It is a single locking, spring open and close and has a key retaining mechanism.

Dimple Keys

38mm shackle

75mm shackle

KEY FEATURES AND BENEFITS

- High security dimple key cylinder with up to 100,000 available combinations, covering every situation.
- Supplied with one key per lock (additional keys available).
- Body and keys etched with key number as standard, enabling easily matching of separated components.
- Key retaining mechanism to avoid the lock being closed without the key.
- Nylon body and brass internals show good resistance to caustic and corrosive environments.
- Padlocks keyed to your specific requirements - Keyed to Differ, Keyed Alike (Master and Differ and Keyed Alike Sets are available on request).
- 9 colour options, Red, Blue, Yellow, Green, Purple, Black, Orange, White and Teal, for clear identification.
- Standard safety/owner label on both sides, engraving or bespoke labels are available on request.

APPLICATION

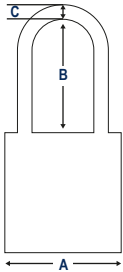

- Commercial
- Industrial
- Lockout/Tagout systems
- Internal or external applications
- Suitable in various temperature situations

RESISTANCE

- Good chemical resistance to alcohols, alkalis, greases and oils, and ketones
- Temperatures from -20°C to 120°C
- Non-conductive nylon body
- Caustic and corrosive environments
- Rustproof
- Spark proof
- UV protection - light stabilised coloured master batch
- Dielectric constant - 3.6

Ensuring that each employee has a unique padlock key is a cornerstone of any robust lockout programme. It guarantees that only one person can open each padlock ensuring everyone's safety.

The Sentinel lock control programme from Reece Safety guarantees your site will be free of duplicate locks both now and into the future. Being safe couldn't be easier, all padlocks provided can be logged in our unique Sentinel registration system, all brass padlocks are recorded as standard. Any repeat orders are checked against this database and new locks will be provided with new numbers to avoid duplication. What's more this service is completely free of charge and can be provided at either plant or company level, incorporating multiple sites. Please request when placing your order
