

DUPLICATE LOCKS CAN COST LIVES

Ensuring each employee has a unique padlock key is essential to a safe Lockout program. It guarantees that only the assigned worker can remove their lock, preventing accidental removal and the serious risks that come with duplicate locks on site.

Duplicate locks can cost lives.

At Reece Safety, we can guarantee over 100,000 different key combinations, meaning that the chances of a duplicate being on site are next to none. Enrolling your orders in our Sentinel system further eliminates this risk entirely!

To enroll in our free-to-use Sentinel program, please complete the fields and submit to US.sales@reecesafety.com with your order.

Disclaimer: This form must be submitted with every order to ensure that duplicate key numbers are not issued to the customer. If the form is not provided, key numbers will not be tracked or checked against previously supplied locks. As a result, locks with key numbers already issued may be supplied. Reece Safety accepts no responsibility for any consequences arising from failure to follow this key-number submission process. This document is for administrative purposes only and is not legally binding.
